*What could change to help you and your colleagues travel less
by plane for work?*

In your wildest dreams, how else would you journey the world?

These are some of the factual and imaginative questions posed to anonymous travellers during the artists' 6,500 km journey across Europe's railways. Recorded replies are set within a dynamic soundtrack, with visuals that celebrate stunning landscapes as seen through the train window.

**Don't miss this chance to experience visual and musical artistry,
and to give your views on rail over climate-intensive plane for work
trips. Mark your calendars!**
